### Twister Deck Rules

Players: 4 or 6 in teams

One member of each team will be the Strategist, and takes either the four Color cards or the four Body Part cards. The rest of each team gets ready to play Twister. Each Strategist picks a card from their hand and lays it face down. Cards are flipped simultaneously and the results are called out. The other team members must place their hands or feet as per the usual rules.

Once one Strategist has placed a card face down, the other Strategist should play their card within five seconds, or the first player can call "slow play" and select a card randomly from the other player's hand.

After calling the results, the Strategists should check to make sure the players are all legally positioned.

After every play, the Strategists trade hands, so they have the other four cards.
